Education

Indian Institute of Information Technology, Nagpur

Dec. 2020 - June 2024

Bachelor of Technology (B.Tech), Electronic and Communication Engineering

CGPA : 7.81/10

Technical Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, TypeScript
Styling & UI: Tailwind CSS, Material-UI (MUI), Bootstrap, Framer-motion
State & Data Management: Redux Toolkit, React Context API, RESTful API Integration, Axios
Developer Tools: Git, GitHub, Vite, Postman, VS Code
Backend & Databases: Node.js, Express.js, MongoDB

Experience

Isourse Technologies

May 2025 - Feb 2026

Frontend Developer

New Delhi

- Led the frontend development for an **HRMS Payroll module**, handling compliance-based salary structure configuration and monthly salary generation tied to attendance approval, with downloadable salary slips for employees.
- Developed an in-house **candidate assessment platform** using **React** and **Tailwind CSS**, featuring **one-time passcode login**, device checks, an **AI-integrated questionnaire module**, and timed tests with autosave answers.
- Built an admin dashboard for on-demand candidate scorecards, enabling in-house screening and reducing assessment-tool costs by an estimated **Rs. 8,000-10,000** per month.
- Owned the frontend implementation of a Smart Mail Manager with an AI-assisted editor and scheduled toggles, dispatching **200+** automated emails monthly across attendance alerts and hiring communications.
- Converted Figma designs into responsive production interfaces for enterprise client accounts, applying **code-splitting** and **lazy loading** practices to improve page load performance.

Purezsa Technologies

Jan 2024 - July 2024

MERN Stack Developer Intern

Ahmedabad, Gujarat

- Enhanced and optimized UIs for a Resume Portal and Matrimony Site using **React.js**, **Next.js**, Tailwind CSS, and Redux, ensuring responsive and visually appealing designs.
- Contributed to frontend development of a Quotation-Invoice Generator, applying **APIs** and collaborating with backend developers to deliver data management and interactive features.
- Built and maintained RESTful APIs with Node.js and Express, integrating secure payment gateway functionality and a responsive landing page with animations.

Projects

FancyFinds4U | Vite, ReactJs, MongoDB, Node.js, Tailwind CSS, Stripe, Razorpay

[Github] [Live]

Fullstack App

- Created a responsive and user-friendly UI with **React** and **Tailwind CSS**, enabling seamless product filtering, searching, and sorting for an improved shopping experience.
- Applied secure authentication with **JWT**, including forgot and reset password functionality to enhance user security and accessibility.
- Developed a scalable backend using **Node.js**, Express, and **MongoDB**, integrating **Stripe** and **Razorpay** for secure online payments and **Cloudinary** for optimized image storage.
- Designed an admin panel for product management (adding, updating, deleting) and order tracking with real-time status updates, streamlining operations.

BlogifyHub | Vite, ReactJs, MongoDB, Express.js, Node.js, Tailwind CSS, Multer

[Github] [Live]

Fullstack App

- Created a full-stack Blog application with **Vite** and **ReactJs**, crafting an interactive UI with **Tailwind CSS** for a modern user experience.
- Applied a robust user authentication system using **bcryptjs** and **JWT** for secure login and signup, ensuring data integrity and privacy.
- Developed a scalable backend with **Node.js**, Express, and **MongoDB**, supporting creation, editing, deletion, and interactive comments.
- Streamlined user sessions with cookie-parser and express-session, and improved file uploads using **Multer** for efficient image storage.
